New Drin 3 (India):
The 10th April, 1950.

S. P. JAIN for Registrar Ceneral, India

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5.7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the article. Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simila.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 11th March 1950—contd.

REMARKS

The figures of births and deaths shown in this statement for the week ending the 11th March, 1950 relate to 196 towns with an estimated population of 25,392 thousands. The total number of towns is 231 and their population is 28,171 thousands. Thus 85% of the total number of towns representing 90% of the total population is covered in this statement. The numbers of births and deaths recorded in those towns were 12,752 and 9,297 representing birth and death rates of 26·1 and 19·0 per thousand of population respectively.

(A) States—(Parts A and C):—The data here relate to 167 towns with an estimated population of 22,394 thousands. Information for Bihar and Assam could not be included. The total number of towns is 199 and their population is 24,599 thousands. Thus 84% of the total number of towns representing 91% of the total population is covered. The numbers of births and deaths recorded in these towns were 11,259 and 8.462 representing birth and death rates of 26.1 and 19.6 por thousand of population respectively. The table at

the end gives the position by states.

The towns of Nellore and Srivilliputtur in Madras, Puri in Orissa and Nobadwip in West Bengal recorded high death rates of 52.8 and 50.6; 54.4 and 55.7 respectively. The high death rates in Nellore and Srivilliputtur were not due to any one of the specified causes. In Puri, the high death rate was mainly due to deaths from smallpox and dysentery and diarrhoea, and in Nabadwip due to Cholera.

(B) States—(Part B):—The data here relate to 29 towns with an estimated population of 2,998 thousands. The total number of towns is 32 and their population is 3,572 thousands. Thus 90 of the total number of towns representing 84% of the total population is covered. The numbers of births and deaths recorded were 1,493 and 835 representing birth and death rates of 25.9 and 14.5 per thousand of population respectively. No town recorded a high death rate of 50 or over per thousand of population.
